Why use strapping cart?

Without strapping cart, the strap is always put on the ground, so you have to pull it in some length each time when you need it. Meanwhile, the strap easily gets into rolls, becomes disorder or dirty. It costs you more time, slow the working efficiency, bring bad mood, and affect the product image.

With the strapping cart, you will never meet the above-mentioned problems but have a tidy and orderly working condition. It helps you save time and cost!

Loading procedures:

- 1、 Take off the toolbox from the cart
- 2、 Put down the cart on the ground
- 3、 Take off the outer plate and load the strap clockwise
- 4、 Put the outer plate on and screw it tightly
- 5、 Stand up the cart, lead the strap from the brake

Load the strap clockwise as showed
