CARGO-FORCE® —TiltWatch Plus

Tilt indicator can clearly show whether the goods had been tilted, traversed or inverted in transit or storage.

It also monitors whether the goods were stored properly. Simple, cost-efficient, and highly effective, these attention-getting devices provide visual deterrents to unacceptable handling, no matter what you're shipping.

Product selection

There are two tilt indicators in option, **TiltWatch** or **TiltWatch Plus**, with different requirement of tilt angle indication.

TiltWatch Plus is the best indicator product when you want to find out whether the goods were damaged by tilting or dropping in transit.

Product Features

* TiltWatch Plus incorporates three separate indications- two that determine the exact angle of tilt and from what direction the shipment tilted, and one that indicates whether complete overturn has occurred — providing complete 360° monitoring. It will not activate during normal handling conditions, such as take-off angles.

* A non-magnetic stainless steel record ball set in the transparent plastic tube. It works precisely in any adverse environment.

* Other features are similar to TiltWatch.

Application

*Large precision parts, refrigeration equipment, medical equipment.

*Large-scale computer systems, network information systems, electronic communications equipment. *Top-heavy equipment, heavy machinery, large-scale computer equipment, circuit boards, a large battery, hydraulic, etc.

*Large glass products.
