

CARGO-CARRY —Fork Extension

Fork Extensions are used to extend the length of forks when long objects or large chassis need to be lifted and moved. It improves the efficiency of the forklift and ensures secure operation, specially for cargo in bigger size.

Product Features

- *Heavy-duty high-strength steel plate, fits forks \leq 50mm in thickness
- *Steel retaining ring welded on the end, prevents forks extensions from sliding off in use
- * Applicable to the larger load operation
- *Sold in pairs only

Attentions!

- *Fork extensions being installed is not allowed exceed 50% longer than the original forks. In another word, it can't be installed on the original forks shorter than "Min Fork Length" as the below specification sheet stated.
- *During use, attenuation curve of the load (the connection of load center distance, lift height and the remaining load) should be taken into account to ensure safety.
- * The load center of fork is 50 mm thick, steel wire rope on the front-ends prevents objects from sliding.
- * Every 25mm fork extension exceeds the original fork, the load is reducing as follows:
 - a) 2000Kg-load forklift: 77Kg/25mm
 - b) 2300Kg-load forklift: 73Kg/25mm
 - c) 2500Kg-load forklift: 70Kg/25mm

Specification

Model	Fit Fork Width (mm)	Min. Fork Length (mm)	Extension Length (mm)
3KR57	102	1016	1524
3KR58	127	1220	1830
3W667	127	1016	1524
3KR59	152	1220	1830
EX604	100	1017	1525
EX964	100	1623	2435
EX485	125	813	1219
EX965	125	1623	2435
EX486	150	813	1219
EX966	150	1623	2435
