

CARGO-MOVE®
—Liquid Packaging System

Liquid Packaging System has been almost realized the localization production and sale in China since it was introduced from U.S.A. It consists of two parts, the outer layer is made from high-strength corrugated paperboard and inner layer is from food grade or aseptic film bag. The product is designed to fit the size of container. It saves a lot in cost and labor force for your liquid cargo transport and storage.

Product Components

- Liquid bag
- Air cushion
- octagonal boarding case
- Base pallet
- Head cover

Product Features

- Take full use of the container space; reach the container's maximum loading capacity; reduce the transport cost.
- 830-1000 liters of liquid is filled each time, making the work easier.
- The corrugated paperboard used is recyclable, environmental-friendly.
