CARGO-SORT® —Flow Rack

Flow Rack is a revolutionary new shelf product when the simple storage function of traditional racks and shelves can't meet the requirement of multi-function and higher logistics efficiency. You can store the goods on its roller wheels from one side and later pick them on another side.

Product Features

- *First In First Out (FIFO) is the design concept of flow rack.
- *Front Beam and Back Beam mounted on the sides, the stored goods moving the entry side to the picking end under the force of gravity.
- *FIFO design realizes one-time replenishment & many time picking.
- *High efficiency storage, suitable for short-term storage and selection of large quantities goods.
- * Plastic bins, paper boxes, and especially container are commonly used on flow racks
- *The roller wheels are made of high-quality thermoplastic with minimal friction coefficient, excellent shock resistance and breakage-proof.
- * It has good chemical property of good anti-acid and anti-alkali, anti-humidity, usable in wet environment.
- *Used together with Pick-to-Light System, it helps to realize paperless worksite management, suitable for the selection of multi-species & small quantities products.

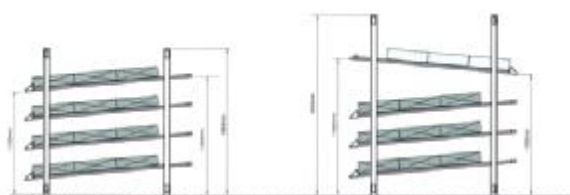

The Brake can reduce the forward force and slowdown the sliding speed of goods

Product Structure

Multi-layers design, effectively reduces 30% storage space, also meet the display needs on different occasions.

Application

Used in a wide range of industries such as manufacturing, commercial distribution, transportation, warehousing, logistics centre and so on.

Specification

| Model | Structure | Length (mm) | Width (mm) | Height (mm) | Load/Layer (kg) | Layers | Max Load (kg) |
|-------------------|----------------------------------|----------------|---------------|----------------|--------------------|--------|------------------|
| 1800W*1200D*2000H | main -frame | 1800 | 1200 | 2000 | 300 | 4 | 1200 |
| 1800W*1200D*2000H | sub-frame (single side shelf) | 1800 | 1200 | 2000 | 300 | 4 | 1200 |
