CARGO-SORT®

— Stacking Rack

Stacking Rack is also called stacking frame. It has unified specification, fixed capacity, and good visibility for easy stock count. It is stackable, forming three-dimensional storage without shelves. With mechanical handling equipment, it is used in different sections of logistics supply chain.

Product Features

- *Can be moved individually or in stacking conditions.
- *Move freely to any flat ground, exit platform, trucks, warehouses, etc.
- *Reduce handling cost, improve efficiency
- *Save 50% storage space, reduce the costs of storage and management.
- *When not in use, it can be folded to save space.
- *It has good shock resistance, protecting the stacking goods from damage in the movement
- *Made of high-quality steel, high strength, long life, acid & alkali resistant, non-perishable, non-combustion, recyclable
- *Anti-parasitic bacteria, easy to clean, tasteless & odorless, no pollution, can be used for food and pharmaceutical industries
- *Strong and durable, load capacity up to the international standards, smooth surface no nails to damage package.
