

## CARGO-TOOL® —Vernier Caliper

**Vernier Caliper** is a length measurement instrument. It's made up of main scale (unit: mm) and sliding vernier (10, 20 or 50 scale divisions). According to different scale division, it is divided into corresponding vernier caliper.

### How to Use?

Main scale and vernier has two moving jaws, **inner measuring jaw** to measure inner diameter; **outer measuring jaw** to measure outer diameter and length.

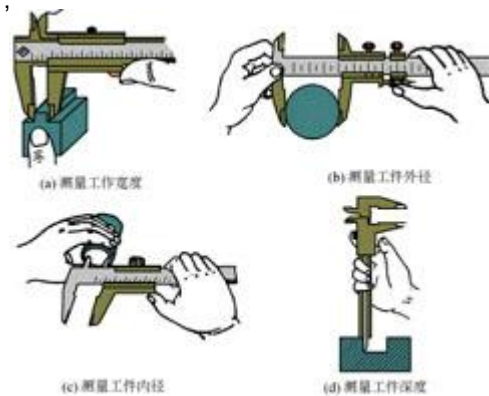

**Four measure modes:** outside diameter, inner diameter, depth and jump.

### SMCT Product Features

\*With the treatment of abrasion and rubbing. Hardness reaches HRC58.

\*Scale surface: lackluster chromeplated, rustless.

\*Two flange on main scale, for scale surface abrasion-proof.

### Starrett Product Features

\*Quench hardening stainless steel material, long service life, laser scaled, chromeplated polishing surface.

\*Precision meets DIN862 standard.

\*Available in measurement of inside/outside diameter, depth and so on.
